CATALOGUE OF THE GRAVES

In the following catalogue detailed information on the burials and grave goods from the Y and YW soundings and the Z trenches are provided. When possible, burials have been grouped and listed according their spatial location (i.e. Sector A, Sector B etc.). A schematic description of the burial structure and body has been given. The grave goods tables are organized according to a hierarchical system starting from the excavation area (Y and YW soundings), then followed by the archaeological/structural phase. Information about each artifact include the identification number (excavation number, museum number and new number), the find-spot (usually the elevation), the type of objects, the reference (when already published) and the plate. With regards to the reference, in order to make the reading of the tables easier, the following publications have been shortened as follows: Algaze 1983-84 = Algaze; Langdon 1930 = JRAS; Moorey 1966 = Iraq; Moorey 1978: Microfiche 2 = Kish; Watelin and Langdon 1934 = EK IV; Field Museum online database = FIELD.org; Rathbun 1975 = Rathbun; H. Field Records of Anthropological work with Anthropometric measurement wherever possible (unpublished report) = H. Field (unpublished report). When no reference is given, information have been collected from the unpublished cards.

Y SOUNDING PHASE 3b

G 382

Stratigraphy and spatial location	South end of the Y sounding, northeast of G 370.
Type of structure and dimensions	Simple pit grave.
Gender and age	1 adult
Body position and treatment	/
State of preservation	Few bones
Reference	H. Field (unpublished report)

G 406

Stratigraphy and spatial location	Cut through the centre of an ancient room and using its mudbrick floor as base.
Type of structure and dimensions	Simple pit grave with mudbrick floor.
